Sara Wong — Ethereum Data Engineering & Pipeline Lead

Email: sara.wong@example.edu | GitHub: github.com/sarawdev | Sydney, AU

Professional Summary

Blockchain data engineer; extracts historical Ethereum data & reduces to experimental subsets.
Handles reproducible datasets (<1000 block samples) for SOLSTICE testing phases.

Key Skills
- Ethereum RPC, geth/erigon tooling
- Data extraction & schema design (Postgres, parquet)
- Golang/Python ETL scripts
- Containerized data pipelines (Docker Compose)
- Dataset packaging for benchmarks

Relevant Coursework: Data Engineering; Distributed Databases; Blockchain Analytics.

Selected Projects
- Mini Ethereum History Sampler (500■block)
- On■Chain Metrics ETL (ERC■20 index)
- Storage Growth Dashboard

Contribution to SOLSTICE

Own data fetch/cleaning; produce reproducible datasets; coordinate with perf engineer.
